

App. No. 10/605,013

REMARKS - General

Applicant has rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art especially over the Halm U.S. Pat. Application US2003/0092454 as the messages are sent for specific real time immediate event providing the user with real time notification. This is not done in the Halim Patent Application. The current Application is designed as a means to notify uses by SMS through the use of a website of immediate specific events such as being outbid at auction website, being notified if you have a match at a dating website, etc.. This is a significant improvement over prior art and over the referenced prior art of Halim. This was something that was not done at the time of the invention.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

Conclusion

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

Respectfully submitted,

Jeffrey M. Furr, Esq.
